ABOUT THE CONFERENCE

The pharmaceutical sciences is a dynamic and interdisciplinary field that combines a broad range of scientific disciplines that are critical to the discovery and development of new drugs and therapies. Over the years, pharmaceutical scientists have been instrumental in discovering and developing innovative drugs that save people's lives and improve the quality of life.

NIPiCON was initiated in a year 2013 to offer a common platform for academicians, researchers, industrialists, clinical practitioners and young budding pharmacists to share their ideas and research work and finally emerge with new concepts, innovations and novel strategies for various challenges in the pharmaceutical field.

The 3rd International Conference, NIPiCON 2016 aims to provide a knowledge sharing experience in the area of "Global Challenges in Drug Discovery, Development and Regulatory Affairs".

Pharmaceutical innovation is a complex creative process that harnesses the application of knowledge and creativity for discovery, developing and bringing to clinical use, new medicinal products that extend or improve the lives of patients. A successful pharmaceutical R&D process is one that minimizes the time and cost needed to bring a compound from the scientific 'idea', through discovery and clinical development, to final regulatory approval and delivery to the patient. This conference will provide an open forum for the academicians, researchers, clinicians and professionals of pharmaceutical industry to enrich their knowledge in the area of drug discovery, development and its regulatory requirements.

The conference features plenary sessions which will be delivered by eminent national and international speakers from different disciplines of pharmaceutical field. In addition, there will be invited lectures and sessions delivered by distinguished and young researchers in their respective fields during parallel technical sessions. The conference will also provide the opportunity to scientists and research scholars from various organizations to put forth their innovative ideas and research findings by means of deliberations, discussions and poster presentations.
